

30-Day Delivery Plan — Quantified Marketing Response

v1.1 · 18 September 2026 · Fahad Siddiqui (Marketing) → Gautam (Smile Club, accountable owner)

Responding to: Smile Club Marketing Activation Action Map v4 — now including the proposed budget (page 3).

Mandate accepted. 120 paid, active, non-refunded, source-coded membership contracts by 16 October, against the 36 / 60 / 88 / 120 checkpoint line, with bulk CRM at target zero and budget zero. This document maps 100% of the 120 to source, demand basis, method, launch date, tracking and owner, and submits a **proposed DM budget of AED 30,000** with an honest CPL/CAC decomposition (page 3) — marked PROPOSED until Mr Akbar signs the ceiling, allowable CAC and initial release.

120 PAID TARGET · FULLY MAPPED	AED 30K DM BUDGET · PROPOSED	≤ 250 BLENDED CAC GUARDRAIL (AED)	CPL 150 PAID-LANE TARGET · CEILING 200	≥98% ATTRIBUTION · HOLD TRIGGER
--	--	---	--	---

Reading guide

- **Page 2 — the source table.** Every source: paid contribution, qualified-demand basis and the conversion assumption behind it, the marketing method, launch date, tracking code and owner. Assumptions the mandate itself states (website 150 @ 8%; corporate pipeline ≥ 72) are used as given; the clinic branch-flow assumption is flagged for validation in week 1.
- **Page 3 — the proposed budget.** AED 30,000 for 30 days, decomposed honestly: the blended CAC guardrail (≤ 250), the paid-lane CPL target (150, hard ceiling 200), the three-scenario table, and the definitional point that must be agreed at sign-off.
- **Page 4 — channels, funnels & assets.** Six channels with sub-channels, micro-funnels and the asset list (designer-dependent items marked).
- **Page 5 — control and risk.** The reporting spine, the daily rhythm, and the three named risks with their mitigations and the recovery rule.
- **Dependencies called now:** Mr Akbar’s sign-off on the proposed budget and three warm corporate introductions; the historical CRM closeout data from you; branch capacity confirmation in the first daily reviews.

THE 120, SOURCED AND OWNED

SOURCE	PAID	QUALIFIED DEMAND & ASSUMPTION	METHOD	LAUNCH	TRACKING	OWNER
Existing DN clinics	60	20 per branch. Demand basis: live patient flow at Al Wasl, Dr Tosun, AMC — conversion assumption validated against branch footfall in week 1.	Front-desk script + QR standee at all three branches; the offer made at the checkout moment with the savings example; onboarding (first-appointment help) from day one. Daily per-branch count in the 09:00 review.	18–19 Sep	SC-ALW / SC-TOS / SC-AMC (QR per branch)	Front desk + Dr Luvi · reported by Smile Club Coordinator
Corporate	24	Pipeline ≥ 72 membership-equivalent (mandate requirement, ~33% assumed close). Built from Michael Page HR contact, RBS, existing partners + the 3 warm introductions requested from Mr Akbar.	Pilot package per employer: company code + on-site dental day + quarterly aggregated usage report. Discovery meetings this week; payment model (employee-paid / subsidized / employer-paid) agreed per employer.	Discovery now · first pilot w/c 22 Sep	One code per employer	Fahad + Mr Akbar
Website	12	150 qualified opportunities by Day 30 at 8% conversion (mandate assumption). Sources: membership placements on demonstrated-traffic pages, cost-guide module, ZAVIS pilot LP traffic.	Membership placements + Smile Club module on top cost/treatment pages (ZAVIS); eligibility-checked paid support — search-intent tests and offered CTWA; 10-minute contact-centre follow-up on qualified enquiries.	19 Sep (with the portfolio)	UTM + source field per placement / campaign	Fahad + ZAVIS · contact centre follow-up
Clinic resellers	7	2 resellers active and source-coded (mandate requirement).	Reseller agreements + per-partner codes and QR links (partner-code, QR and referral-agreement mechanics already tasked).	Agreements w/c 22 Sep	Per-partner code	Fahad
Affiliates	7	3 affiliates active and source-coded (mandate requirement).	Affiliate agreements with tracked links/codes; commission priced within the CAC ceiling once Finance sets it.	Agreements w/c 22 Sep	Per-affiliate code	Fahad
CSR	4	Community/CSR activation near the branches.	On-the-spot enrolment with the QR flow at community events; each event costed before commitment.	First event by early Oct	Per-event code	Fahad
Brokers	3	Source-coded broker agreements.	Same mechanics as resellers; terms within the CAC ceiling.	w/c 22 Sep	Per-broker code	Fahad
Distributors	3	Source-coded distributor agreements.	Same mechanics as resellers; terms within the CAC ceiling.	w/c 22 Sep	Per-distributor code	Fahad
TOTAL	120	100% of the mandate mapped. Checkpoints: 36 by 23 Sep (min 30) · 60 by 30 Sep (min 50) · 88 by 7 Oct (min 75) · 120 by 16 Oct.				

Bulk CRM: target 0, budget 0, per the mandate. The historical CRM test closes 18 Sep on your data (71 replies classified, 417 failures coded, reconciled to payment and membership records). Any future CRM contact is limited, consented and non-bulk — used for onboarding and activation, not counted as an acquisition source.

AED 30,000 FULL DM BUDGET · ALL LANES	≤ AED 250 BLENDED CAC GUARDRAIL (30K ÷ 120)	AED 150 PAID-LANE CPL TARGET	AED 200 CPL HARD CEILING (BREAK-POINT)
---	--	--	---

The blended guardrail ($250 = 30,000 \div 120$, i.e. 18–25% of the first-year fee of AED 999–1,399) is a **mandate-level** metric — it is achieved by the low-media channels delivering their 108, and it must never be used to justify the paid lane. The paid lane is judged on its own numbers below.

Paid-lane scenarios — measured against the website target (12 paid from 150 qualified @ 8%)

SCENARIO	COST OF 150 LEADS	LEADS WITHIN 30K	PAID @ 8%	PAID-LANE CAC	VERDICT
CPL 150 — target	AED 22,500	200	16	~AED 1,875	Website-12 beaten with 7.5K headroom for the other lanes.
CPL 200 — ceiling	AED 30,000	150	12	AED 2,500	Exactly on plan; zero headroom — the operating break-point.
CPL 500 — downside	AED 75,000 (2.5× budget)	60	~5	~AED 6,000	Recovery trigger: shift budget to clinic/corporate enablement + warm audiences; website target revised.

Dropped from the earlier draft: a CAC target of AED 70. Unreachable under any paid scenario — it would require more than two memberships per lead at target CPL — and only meaningful as a blend at ~AED 8,400 spend. Paid-lane CAC at target CPL (~1,875–2,500) exceeds the first-year membership fee on its own: it is justified only by incremental treatment revenue, which the pilot measures. Until measured, paid stays capped at this budget.

Definition to agree at sign-off. Under the mandate’s formula (working-media ceiling = paid-media acquisition target × allowable CAC), 12×250 authorizes only AED 3,000 of direct-acquisition working media. The 30K is therefore submitted as the **full DM budget supporting all lanes** — awareness, retargeting, corporate air-cover, offer creative — with direct acquisition as one slice. Agreeing this labelling now prevents a definitional “overspend” finding at the first checkpoint review.

Approval requested

- 30-day DM budget: **AED 30,000** · initial release per the 17 Sep funding gate, remainder after the 30 Sep review.
- Blended allowable CAC: **AED 250** (guardrail) · paid-lane CPL operating ceiling: **AED 200**, with the pre-agreed recovery rule beyond it.
- Budget classification: full-DM-budget labelling as above.

Each channel runs its own micro-funnel; all of them roll up into the mandate spine (**enquiry** → **qualified** → **checkout** → **paid** → **card active** → **booked** → **attended**) via their source codes. Assets marked ♦ depend on the in-house designer hire — the launch set ships without them; they upgrade the mix when the hire lands.

CHANNEL (TARGET)	SUB-CHANNELS	MICRO-FUNNEL	ASSET TYPES
In-clinic (60)	Front desk at checkout · waiting area · chair-side mention by clinician	Visit → offer made → interest → QR enrolment → card active → first benefit booked	Front-desk script EN/AR · QR standee per branch · counter card with the savings example · staff FAQ one-pager · waiting-area poster ♦ · consented 1-to-1 WhatsApp follow-up template
Corporate (24)	Warm intros · on-site dental days · HR internal comms	Intro → HR meeting → pilot agreed → employees reached → coded enrolments → activated	Corporate one-pager (pilot package + savings math) · HR email kit · employer code + enrolment page · on-site day kit (banner ♦, screening forms, QR) · quarterly usage-report template
Website — owned (12)	Membership page · cost-guide & treatment-page modules · knowledge-base house ads · booking-widget cross-sell	Page visit → membership view → enquiry / checkout start → qualified (10-min contact centre) → paid	Membership module/banner EN/AR · savings-examples block · plain-language FAQ rewrite · checkout copy
Paid digital (supports the 12)	Google Search (membership + cost intent) · Meta CTWA offer lane · retargeting (site visitors; lists only after the eligibility check)	Impression → click → LP / WhatsApp chat → qualified lead (CPL measured here) → checkout → paid @ 8%	Search ad copy set EN/AR · 3–5 CTWA statics + offer cards ♦ · retargeting statics ♦ · LP membership variant · WhatsApp quick-reply scripts
Partners (20)	Resellers 7 · affiliates 7 · brokers 3 · distributors 3 — per-type agreements	Agreement → partner promotes → coded referral → qualified → paid	Partner kit (explainer + code/QR + commission sheet) · co-branded flyer template ♦ · WhatsApp share cards
CSR / community (4)	Events near the three branches	Footfall → conversation → on-the-spot QR enrolment	Event banner ♦ · QR flyers · savings one-pager

Asset production: copy and templates — Marketing; automated statics — the creative pipeline; ♦ items wait on the designer hire (decision due this week). No channel launch is blocked by a ♦ asset — each lane has a designer-free launch set.

Spend, CAC & funding gates

- **Working-media ceiling** = paid-media acquisition target × allowable CAC. Finance sets the CAC; Mr Akbar signs the 30-day ceiling and initial release (the blanks on the mandate's sign-off page). This plan submits forecast CAC by activity + blended total the day the ceiling lands.
- **Funding gates:** 17 Sep initial launch funding against this plan → 30 Sep Day-15–30 funding after pace, CAC and data review → 16 Oct next-period funding for proven sources.
- **Reallocation:** up to 10% may move within the ceiling, reported the same day.
- **Decision rules as mandated:** SCALE when pace and CAC meet plan · OPTIMIZE when demand exists but conversion trails · HOLD when attribution < 98% or CAC breaches the ceiling.

Reporting & rhythm

- Every activity source-coded: branch QR, employer code, partner code, UTM. One report — the dashboard spine: **enquiry** → **qualified** → **checkout** → **paid** → **card active** → **booked** → **attended**.
- Daily: 09:00 outcome review · 16:00 recovery queue · EOD scorecard, run with the Smile Club Coordinator; weekly resource decision with you.
- Marketing reports paid outcomes, forecast accuracy, CAC and attribution; reach, clicks and replies stay diagnostic — as the mandate requires.

Risks and recovery

- **Creative assets.** The in-house designer gap limits paid creative volume for the website lane. Mitigation: Creative OS output + offer-led formats; the hire decision (19 Sep) is the unlock.
- **Corporate intro timing.** The 24 depends on doors opening in week 1. Mitigation: Michael Page and RBS conversations start immediately; Mr Akbar's three introductions are requested at sign-off.
- **Clinic capacity.** 60 clinic conversions must be servable — branch appointment availability is checked in the daily review before pushing volume; capacity is an explicit gate.
- **Recovery rule:** any missed checkpoint minimum → recovery plan the next business day, as mandated.

What this plan needs, and when

- **From Mr Akbar (at sign-off):** 30-day ceiling, allowable CAC, initial release; the three warm corporate introductions; CRM-hold confirmation.
- **From you (18 Sep):** the historical CRM closeout data for joint review; the member baseline feeding the savings examples and funnel definitions.
- **From Finance (rolling):** payment validation and CAC verification at each checkpoint.

One line for the record: outcome mandated, method delegated — this document is the method. Where a number was not given by the mandate or by Finance, it is marked open rather than invented, and the first week's data replaces assumptions with actuals.
